12.3.8 v.6

ASH GROVE CEMENT COMPANY

SEATTLE, WA 98134
INTER-OFFICE MEMORANDUM

Date: November 3, 1992

To: Jerry Brown

From: Pat Noon *PN*

Copies to: Ken Rone

Subject: Containment Tank
Grinding Aid

=====

Jerry last week the electrical department while emptying a manhole pumped 12 inches of water into the concentrated grinding aid containment area. We have tested this water by refractometer and found the reading to be 0.1 brix units. Regular tap water has a reading of 0.05% brix units. This indicates that there is presently no contamination in the containment water and it can be pumped to the sewer.
